

Reverse Commercial License Plate Configuration

New Information

The existing configuration of commercial license plate numbers will soon be depleted. Beginning May 2010, newly manufactured commercial license plates will contain a “reverse” configuration. The reverse configuration will contain numbers in the first 5 positions, a letter in the 6th position, and a number in the 7th position.

The chart below indicates the positioning for the commercial plate and the commercial plate reversed:

Inventory Description (Numerical Order)	Configuration/Character/Count (N= Numeric, A= Alpha)							
	1	2	3	4	5	6	7	8
Reflectorized Commercial Plates	N	A	N	N	N	N	N	
Reflectorized Commercial Plates (Reversed)	N	N	N	N	N	A	N	

The new series of plates with the reversed configuration sequences are:

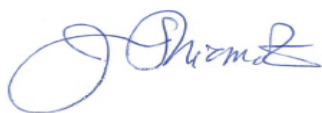

1. 00000A1 through 99999A1
2. 00000B1 through 99999B1
3. 18350B1 through 22299B1
4. 22350B1 through 99999B1
5. 00000C1 through 11999C1

Distribution

Notification that this memo is available online, at www.dmv.ca.gov under Publications was made via E-Mail Alert System in December 2009.
